

PRASANNA

Motivated and adaptable BCA graduate in Computer Applications eager to contribute to Organization as a Software Developer. With a solid foundation in web development, java programming and a strong commitment to continuous learning, prepared to tackle challenges and drive innovation in dynamic environments.

INTERNSHIP AND PROJECTS

Java Full Stack Internship

AUG 24 - FEB 25

Organization: Uniq Technology

Description:

Currently undergoing a Java Full Stack internship focused on building end-to-end web applications. Gaining hands-on experience in backend and frontend development, including technologies like Java, HTML, CSS, JavaScript, and frameworks/tools commonly used in full-stack development.

Online Shopping Mobile Application

Major Project

NOV 23 - MAR 24

Description: Developed a feature-rich online shopping mobile application aimed at empowering merchants to efficiently manage their products. The application enables merchants to create an admin account for seamless product insertion, updating, and deletion. Designed to provide a user-friendly interface and robust functionality, the app streamlines the management of online storefronts.

Technologies Used:

- Programming Language: Java
- UI Design: XML
- Build Tool: Maven
- Database: Firebase
- Tools : Android Studio

Personal Portfolio

Mini Project

JULY 23 - SEP 23

Description: Designed and developed a responsive personal portfolio website to showcase personal details, resume, skills, and contact information. The website features a modern, user-friendly interface optimized for various devices. It serves as a professional platform for presenting personal achievements and connecting with potential opportunities.

Technologies Used:

- Frontend: HTML, CSS
- Interactivity: Basic JavaScript
- Tools : Visual Studio Code
